## HEATING & AIR CONDITIONING

13 SEER HEAT PUMPS

You can count on your **Xenon Heating and Air Conditioning 13 SEER Heat Pump** to keep you cool on even the hottest summer days and warm on the coldest winter nights. Your **Xenon Heating and Air Conditioning 13 SEER heat**

pump starts with a high-performance, energy-efficient compressor that operates in tandem with our high-efficiency coil. The coil is made of rifled refrigeration-grade copper tubing and corrugated aluminum fins in a design that maximizes surface area. These high-quality components together cool your home effectively.

We know that the last thing you want to hear at night is a noisy heat pump starting up. So, we build our **Xenon Heating and Air Conditioning**

**13 SEER Heat Pumps** with sound-dampening features that help ensure that your cooling system doesn't interfere with a good night's sleep. We rely on a quiet condenser fan system – a three-bladed fan and a unique louvered

sound-control top – to reduce fan-related noise. Your **Xenon Heating and Air Conditioning 13 SEER Heat Pump** will keep your home cool and comfortable, year after year.

Plus, we protect it with a strong warranty, a testimony to our faith in the quality of this product. **The Xenon Heating & Air Conditioning 13 SEER Heat Pump** is protected by a **10-Year Parts Limited Warranty\*** on all functional parts.

\* Complete warranty details available from your local Xenon Heating and Air Conditioning dealer or at [www.goodmanmfg.com](http://www.goodmanmfg.com). To receive the 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.

# 13 SEER HEAT PUMPS

So, when do the savings come in? Your new **Xenon Heating and Air Conditioning** 13 SEER Heat Pump has a Seasonal Energy Efficiency Rating, or SEER, of 13, providing much more efficient energy use compared with the 8 SEER units found in many homes today. While the annual savings alone are impressive, the savings over time mean real dollars that stay in your pocket, not the utility company's.

Your **Xenon Heating and Air Conditioning** 13 SEER Heat Pump features a heavy-duty louvered metal case that protects its condensing coil from damage and strengthens the overall unit. The raised base pan elevates the unit to provide excellent water drainage and keep outdoor debris away from the coil. In addition, the case's rich gray color blends in beautifully with all types of home exteriors and landscapes, and its appliance-quality powder-paint finish means an attractive unit for years to come.

## Features of the Xenon Heating and Air Conditioning 13 SEER Heat Pumps

- A high-performance, energy-efficient compressor
- SmartShift™ Defrost Technology with short-cycle protection
- 5mm SmartCoil™ condenser coil in select models
- Factory-installed, bi-flow liquid line filter drier
- Brass liquid and suction line service valves
- Copper tube/aluminum fin condenser coil
- Reliable time-initiated, temperature-terminated defrost control
- Service valves with sweat connections and easy-access gauge ports
- Contactor with lug connection
- Ground lug connection
- Louvered sound control top design
- AHRI certified; ETL listed
