## HEATING & AIR CONDITIONING

### 13 SEER PACKAGED AIR CONDITIONER

Energy efficiency is the key to controlling the cost and comfort of cooling your home or business. Today's minimum efficiency standard as directed by the federal government is 13 SEER (Seasonal Energy Efficiency Ratio). Older installed units in many homes and businesses may have actual operational efficiencies of 10 SEER or less. Not only does replacing your old unit provide the potential for increased efficiency performance, but you will gain peace of mind

knowing that the **Xenon Heating & Air Conditioning** Packaged Air Conditioners provide years of reliable comfort and quiet operation.

Plus, we protect it with a strong warranty, a testimony to our faith in the quality of this product. **The Xenon Heating & Air Conditioning 13 SEER packaged air conditioner is protected by a 10-Year Parts Limited Warranty\*** on all functional parts.

\* Complete warranty details available from your Xenon Heating & Air Conditioning dealer or at [www.goodmanmfg.com](http://www.goodmanmfg.com). To receive the 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.

## 13 SEER PACKAGED AIR CONDITIONER

One of the most critical components of a packaged air conditioner is the compressor. That's why the **Xenon Heating and Air Conditioning** Packaged Air Conditioner boasts a high-performance, energy-efficient compressor. It operates in tandem with our high-efficiency coil to maximize the operating efficiency and extend the operational life of the unit. The coil is made of refrigeration-grade copper tubing and aluminum fins in a design that maximizes surface area allowing for an optimal heat transfer process to keep your home or business comfortably cool for many, many years.

So, where do the savings come in? Your new packaged air conditioning unit has a Seasonal Energy Efficiency Rating, or SEER, of 13, providing much more efficient energy use compared to the 8 SEER units found in many homes today. While the annual savings alone are impressive, the savings over time mean real dollars that stay in your pocket, not the utility company's. The **Xenon Heating and Air Conditioning** 13 SEER Packaged Air Conditioner features a fully insulated cabinet that protects the unit's condensing coil from damage and strengthens the overall unit. In addition, the case's attractive Architectural Gray color blends in beautifully with all types of home exteriors, and its appliance-quality powder-paint finish means an attractive unit for years to come.

### *Features of the Xenon Heating and Air Conditioning Packaged Air Conditioner*

- Energy-efficient compressor with internal relief valve
- Totally enclosed, permanently lubricated condenser fan motor
- EEM Blower Motor on 4 and 5 ton units.
- Fully insulated blower compartment for quiet operation
- Chlorine-free R-410A refrigerant
- Louvered condenser coil protection
- Quality powder-paint finish resists fading and corrosion
