Online registration is not required in California or Quebec.

UP TO 95% AFUE MULTI-SPEED, MULTI-POSITION GAS FURNACE

Unlike conventional, single-stage furnace technology, **Xenon Heating and Air Conditioning's** technology helps eliminate the temperature swings resulting from abrupt, high-stage stops and starts of the furnace by operating at a low heating state the majority of the time. This gas furnace has an AFUE rating of up to 95% which means that up to 95 cents of every \$1.00 of heating energy expense warms your home.

Xenon Heating and Air Conditioning's 95% Multi-Speed Furnaces feature a heavy-gauge, reinforced, fully insulated steel cabinet and durable baked-enamel finish that will stand the test of time.

Always in pursuit of the highest performance and efficiency, we are constantly evaluating the latest and most reliable technology and applying it to every Xenon brand gas furnace. But best of all, your new 95% AFUE gas furnace is compatible with the ComfortNet™ system of communicating products. With a large assortment of built-in features, your contractor can auto-configure, monitor, and review data from the system. This allows for optimum performance and accurate detection of any system-related issue.

Features of the Xenon Heating and Air Conditioning 95% AFUE Multi-Speed Gas Furnaces

- Aluminized-steel tubular primary heat exchanger; stainless-steel secondary heat exchanger
- Electronic ignition control
- Durable silicon nitride igniter
- Furnace control board with self-diagnostics
- Self-diagnostic control board with constant memory fault code history output to a dual 7-segment display
- Multiple continuous fan speed options offer quiet air circulation
- All models comply with California low NOx emissions standards
